

25L Chargebag

Product Description

The Ezi-Dock Chargebag is a high performance flexible process package designed to deliver maximum product recovery when handling pharmaceutical and chemical powders.

One of the many unique features of the Ezi-Dock Chargebag is the 2 ply body design. The 2 ply design not only adds much needed strength to the Chargebag, when connected to heavy "Passives" but also adds a further layer of protection against the risk of pinholing.

Manufactured from a Pharma Grade LDPE with an FDA Approved Anti-Static Additive.

Summary:-
