OUR PRODUCTS

COMPONENTS AND EQUIPMENT

Casella Process Solutions' stainless steel components cover a wide range of Pharmaceutical and Bio-Tech manufacturing requirements. Our product partnerships have been developed over years and represent the most dependable and technically advanced solutions to meet the productivity and quality requirements of our customers.

SINGLE USE TECHNOLOGY

Casella Solutions include single use containers and bags made from high purity films that provide excellent barriers to water vapor and gas molecule transmission, tubing, inserts, dip tubes, tanks, mixing devices, hose barb and end caps as a partial list of our disposable component offering.

We also regularly work with customers to solve unique problems of storage, transmission, product isolation, filtration or other processing demands.

PUMPS AND INSTRUMENTATION

Whether you need assurance of sterile operation or an economical solution, our stainless steel and disposable pumps dependably drive production in any sanitary processing application.

Additionally, our experts can help you choose the right instrumentation to help ensure that you are meeting the performance, reliability, cleanability and sterilization requirements for your process.

STORAGE SOLUTIONS

Streamline and improve efficiency with our storage solutions. Products include shelving, carts and organization systems. Our partners have been the world's leading manufacturers of storage and transport products for over 80 years.

We are serving all markets with new and innovative products to increase productivity on all levels.
